

ASK EPA!!

Questions and Answers about Asbestos and EPA's Investigation

Q • What should I do if I am interested in some sort of employment on the cleanup or training for employment?

A • Please submit inquiries to the EPA Information center. The Receptionist will collect basic contact information and any material you can provide regarding your interests.

Materials you could submit include:

- Your training or employment interestes
- A description of your training, skills, abilities and equipment
- A résumé
- Other information for potential employers.

EPA does no direct hiring for the cleanup. EPA works through a prime contractor, which was selected through a competitive process when the Agency began work in Libby. This prime contractor and its subcontractors may be hiring in the future.

There is some training relevant to the work to be done in Libby available through Montana Peaks. Their contact is Shannon Day at 892-5767. The EPA Information Center may be able to provide details about the training. EPA is exploring possibilities for additional training opportunities and will update the community as information becomes available.

For more information, call Wendy Thomi at 406-441-1150 extension 241
